NAME

File::Spec::OS2 - methods for OS/2 file specs

SYNOPSIS

```
require File::Spec::OS2; # Done internally by File::Spec if needed
```

DESCRIPTION

See *File::Spec* and *File::Spec::Unix*. This package overrides the implementation of these methods, not the semantics.

Amongst the changes made for OS/2 are...

tmpdir

> Modifies the list of places temp directory information is looked for.
>
> ```
> $ENV{TMPDIR}
> $ENV{TEMP}
> $ENV{TMP}
> /tmp
> /
> ```

splitpath

> Volumes can be drive letters or UNC sharenames (\\server\share).
